

RAJRISHI KASHYAP

AI Engineer | AI Automation & Voice AI Specialist

Guwahati, India • +91 76368 55807 • raj01rishi@gmail.com • linkedin.com/in/rajrishikashyap • github.com/rajrishikashyap

PROFESSIONAL SUMMARY

AI Engineer with production experience building autonomous AI agents, RAG-based retrieval pipelines, Voice AI systems, and end-to-end ML pipelines. Currently at Geekynd Pvt Ltd deploying agentic AI workflows using Claude API (Anthropic), MCP Servers, Groq LLM, Airtable, and cloud infrastructure (Docker, Google Cloud Run, Git, Cloudflare). Pursuing M.Sc in Data Science & AI from BITS Pilani (2026–2028). ML background includes 20% F1-score improvement, 30% training time reduction, and 90%+ model accuracy across fraud detection, forecasting, and medical imaging. Immediate joiner, open to remote and on-site.

TECHNICAL SKILLS

Languages: Python (proficient), Node.js (backend services), SQL, MySQL

AI Agent & LLM: Claude API (Anthropic), Groq LLM, OpenClaw, MCP Servers (Agentic Tool Integration), Prompt Engineering, Function Calling, LLM Orchestration, RAG (Retrieval-Augmented Generation) Pipelines, REST API Integration

Voice AI: VAPI, DeepGram API (STT), Google Cloud TTS API, Twilio, Call Forwarding, Conversational Agent Design

ML / AI: Supervised & Unsupervised Learning, Classification, Regression, Time-Series Forecasting, Feature Engineering, Hyperparameter Tuning, XGBoost, EDA, Statistical Modelling

Deep Learning: CNN, GAN, CVAE, Autoencoders, Transfer Learning, NLP — TensorFlow, Keras, PyTorch

Automation & CRM: Zapier, SmartTask, Airtable API (DB + Interface), Sendily, Apollo, Instantly, CRM Pipeline Automation, Web Scraping, Zoho Cliq Webhook

Cloud & DevOps: Google Cloud Run, Docker, Git (Version Control), CI/CD Pipelines, Cloudflare Tunneling, Render, VPS, AWS, API Key & Secret Management

Visualization: Power BI, Matplotlib, Seaborn, Streamlit

ML Libraries: Scikit-learn, Pandas, NumPy, NLTK

Tools: Jupyter, Google Colab, Canva, Excel

WORK EXPERIENCE

AI Implementation Associate | Geekynd Pvt Ltd

Apr 2026 – Present | Guwahati, India • On-site

- Deployed production Voice AI Assistant using VAPI, Groq LLM, DeepGram API (STT), Google Cloud TTS, and Twilio, handling 30+ real-time calls/day with dynamic call forwarding and under 2s response latency
- Built AI Lead Generation Machine using a RAG-style retrieval-augmented pipeline: Apollo scraping retrieves raw lead data, Claude API augments and enriches it with context, MyClaw agents qualify and generate outreach, Instantly handles warmed-up email delivery, generating 150+ qualified leads/week autonomously and reducing manual prospecting by approximately 70%
- Architected Airtable (REST API) as central CRM database, managing 1,000+ lead records with automated triggers across 5+ pipeline stages; Node.js backend services for custom integrations
- Configured Cloudflare Tunneling for secure local service exposure and VPS connectivity across deployment environments
- Integrated Zoho Cliq webhook automation for real-time team alerts, cutting hot-lead response time by approximately 60%
- Managed CI/CD pipeline on Google Cloud Run and Docker with Git version control; maintained 99%+ uptime across all AI services
- Engineered web scraping pipelines (500+ records/week); built Zapier and SmartTask workflows saving approximately 15 hours/week of manual ops

Data Science Intern | Hamoye

Mar 2024 – Jul 2024 | Remote

- Built credit card fraud detection models using ensemble ML; improved F1-score by 20% and overall accuracy by 15%
- Automated end-to-end preprocessing and feature engineering pipelines in Python, reducing training time by 30%
- Reduced false positives by 18% through iterative feature refinement, improving production model stability

Machine Learning Intern | Mentorless

Mar 2024 – Apr 2024 | Remote

- Developed financial time-series forecasting models (Scikit-learn, TensorFlow); improved prediction stability by 18%
- Achieved 25% accuracy improvement via hyperparameter tuning and k-fold cross-validation
- Reduced data noise by 35% through large-scale EDA and preprocessing on raw datasets

Research Intern | IIIT Guwahati

Jun 2023 – Aug 2023 | Guwahati, India

- Preprocessed multi-channel EEG signals (64+ channels); engineered frequency and time-domain features

- Trained ML models for emotion classification on neurological data, achieved 85% classification accuracy

PROJECTS

AI Agentic Lead Generation Machine, RAG Pipeline + Autonomous Multi-step Agent

Stack: Claude API · MyClaw · Apollo · Instantly · Airtable API · Node.js · Cloudflare Tunneling · Docker · Cloud Run · Git

Docs: <https://github.com/rajrishikashyap/ai-production-systems>

- Retrieval-augmented generation pipeline: Apollo retrieves raw lead data, Claude API augments and enriches with business context, MyClaw agent qualifies and acts, Instantly delivers warmed-up outreach, Airtable syncs results, 150+ leads/week, zero manual intervention

Voice AI Virtual Assistant, Production Conversational Agent

Stack: VAPI · Groq LLM · DeepGram API · Google Cloud TTS · Twilio · Airtable API · Node.js · Docker · Cloud Run · Git

Docs: <https://github.com/rajrishikashyap/ai-production-systems>

- Production voice agent: 30+ calls/day, intent detection, dynamic responses, smart call forwarding to humans, under 2s latency

Holographic MNIST Reconstruction, CVAE + GAN

Stack: TensorFlow · Python · CVAE · GAN

- Hybrid CVAE-GAN pipeline for holographic digit reconstruction using latent space learning and adversarial refinement

BreastMNIST Medical Image Classifier, SmartMed

Stack: CNN · TensorFlow · Streamlit · Python

Docs: <https://github.com/rajrishikashyap/smartmed-classifier>

- CNN classifier achieving 90%+ accuracy, deployed as real-time inference web app via Streamlit

EDUCATION

M.Sc — Data Science and Artificial Intelligence | BITS Pilani | May 2026 – May 2028

Coursework: Statistics, Feature Engineering, Data Visualization, Data Preprocessing, AI

B.Tech — Computer Science & Engineering | Tezpur University, Assam | Aug 2020 – Jun 2024

Coursework: Data Structures & Algorithms, Probability & Statistics, Linear Algebra, Machine Learning, DBMS, Calculus

CERTIFICATIONS

- Google Data Analytics, Foundations and Data-Driven Decisions, Coursera, Sep 2023
- Google Data Analytics, Ask Questions to Make Data-Driven Decisions, Coursera, Oct 2023
- Python for Machine Learning and Data Science, Udemy, Jose Portilla
- Data Science for Engineers, NPTEL
